MESSAGE CONSENT FORM

I have been advised of all the policies and procedures pertaining to massage and I understand these policies. The massage procedures, information about massage in general, benefits and contraindications of massage, and possible alternative therapies have been explained to me.

I understand that the massage I receive is for the purpose of stress reduction and relief of muscular tension, spasm, or pain, and to increase circulation. If I experience any pain or discomfort, I will immediately inform the therapist so that the pressure or methods can be adjusted to my comfort level. I understand that massage therapists do not diagnose illness or disease, nor do they perform spinal manipulations or prescribe any medical treatments, and nothing said or done during the session should be constructed as such. I acknowledge that massage is not a substitute for medical examination or diagnosis, and I should see a health care provider for those services. I agree to keep the massage therapist updated as to any changes in my health, and I release the massage therapist and Holistic Health Clinic from any liability if I fail to do so.

ACUPUNCTURE CONSENT FORM

NAME _____

DOB: _____

I hereby request and consent the performance of acupuncture treatment and other Oriental Medicine procedures by the below named licensed acupuncturist and/or other licensed acupuncturists to now or in the future treat me while employed by working or associated with or serving as a back-up for the treating acupuncturist named below including those working at the office or any other office or clinic.

I understand that: Acupuncture Therapy is not a substitute for medical examination and diagnosis. It is recommended that I see a medical doctor for any physical ailment for which I may seek acupuncture treatment. I fully understand that: The acupuncture therapy is a safe method of treatment. I have been informed that acupuncture therapy may involve the insertion of several sterile and disposable needles into the skin and realize that some bruising, soreness and superficial bleeding are on occasional occurrence near the needle sites that last for a few days.

Cupping bodywork therapy is an adaptation of an ancient technique; the purpose of it's technique to promote health and healing by: loosening soft tissue and connective tissue scarring and adhesion moving stagnation and increasing lymphatic flow and circulation. This therapy utilizes silicone or plastic cups and vacuum pistol to create suction on the body surface. These cups are moved over the skin using gliding, shaking, popping and rotating techniques while gently pulling up on the cup or may be parked for a short time to facilitate joint mobilization or soft tissue release. Suction reaches deep into the soft tissue, attachments and organs. Another benefit is to pull toxins and inflammation from the body to the surface of the skin where the lymphatic system can more readily eliminate them.

Potential Reactions to Cupping are temporary and may include:

- Discoloration due to toxins and old blood being brought to the surface
- Post tenderness; usually less than experienced from deep tissue work
- Redness and Itching; increased vaso-dilation and/or inflammation brought to the surface
- Decreased Blood Pressure; due to vaso dilation and/or nervous system sedation

I understand that: The clinical and administrative staff can review my medical records and all reports, but all my records will not be released without my written consent.

I have read, or have had read to me the above consent. I have also had an opportunity to ask questions about its content, and by signing agree in the above-named procedures.

I intend this consent for to cover the entire course of treatment for my present condition and any future condition(s) for which I may seek treatment.

MEDICAL TRIGGER POINT THERAPY CONSENT FORM

NAME: _____

DOB: _____

THE TREATMENT

Trigger point injections (TPI) is used to treat extremely painful and tender areas of muscle. Normal muscle contracts and relaxes when it is active. A trigger point is a knot or tight band in muscle that forms when muscle fails to relax. The knot often can be felt under the skin and may twitch involuntarily when touched (called a jump sign). The trigger point can trap or irritate surrounding nerves and cause referred pain-pain felt in another part of the body or in teeth. Scar tissue and loss of range of motion and weakness may form over time. A small needle is inserted into the trigger point and local anesthetic (e.g. lidocaine, procaine), anti-inflammatory or steroid is injected. Injections have been found to be very effective in relieving pain, and may be used in combination with home exercise, heat, cold and individualized

RISK AND COMPLICATIONS

Before undergoing the procedure, understanding the risks is essential. No procedure is completely risk-free. The following risks may occur, but there may be unforeseen risks that are not included on this list. Some of these risks, if they occur, may necessitate additional surgery, prolonged hospitalization, and/or extended outpatient therapy to permit adequate treatment. It has been explained to me that there are certain inherent and potential to; 1. You may develop infection; 2. You may experience bleeding; 3. You may develop irritation at the injection site; 4. There may be skin changes; 5. You may develop bruising, redness or swelling; 6. The lung (or the pleura, which is the surrounding membrane) may be punctured if the procedure is performed in a muscle near the ribcage, and 7. The procedure may fail to reduce the pain symptoms.

RESULTS

You may receive the following benefits. The doctors cannot guarantee you will receive any of these benefits. Only you can decide if the benefits are worth the risk. Trigger point injections is used to alleviate myofascial pain syndrome (chronic pain involving tissue that surrounds muscle) that does not respond to other treatments, although there is some debate over its effectiveness. Many muscle groups especially those in the arms, legs, lower back, and neck are dysfunction, and other types of orofacial pain.

I understand this is an elective procedure and I hereby voluntarily consent to treatment with trigger point injections for myofascial pain. TMJ dysfunction, bruxism and types of orofacial pain including headaches and migraines. The procedure has been fully explained to me. I also understand that any treatment performed is between me and the doctor/healthcare provider who is treating me and I will direct all post-operative questions or concerns to the treating clinician. I have read the above and understand it. My questions have been answered satisfactorily. I accept the risks and complications of the procedure and I understand that no guarantees are implied as to the outcome of the procedure. I also certify that if I have any changes in my medical history I will notify the doctor/healthcare professional who treated me immediately. I also state that I read and write in English.
